- Health Care Solutions
- Long Goods Handling
- Storage Machines and WMS
- Retail Solutions
- Cabinets and cupboards
- Archive Storage Solutions
- Museum Solutions
- Library Solutions

Please visit www.kasten-storage.com for more references.

Storage machines, automates, are computer-controlled storage and transfer systems that significantly improve the efficiency of product storage and picking.

They are easy to integrate with the company's WMS or can be used as standalone systems. The site and operating environment determine the system's size and composition.

An automatic storage system saves up to 70% on floor space, reduces picking errors by 70% and decreases picking time by more than 60%.

The most efficient way of using storage machine is to have article management included with the machine. TC2000 article management software is especially developed for Tornado, Paternoster and HOCA and it can be included as standard to all our machines.
